Product Overview

MOBILETrak Server Wireless Warehouse Management Suite

MOBILETrak from ID Solutions is an exciting new wireless material, management, and barcoding system for your warehouse personnel. Simply enter warehouse transactions on a wireless handheld terminal at the point of activity. The management suite features also include:

- Inventory
- Material charge-out
- Material return
- Item inquiry
- Staking sheet processing
- Purchase requisition
- Purchase order receiving
- Warehouse transfers

Wireless Solution Reduces Warehouse Time and Increases Accuracy

MOBILETrak is designed to emulate the functionality users are already familiar with in the PCS *Utilit-e Insight* inventory transactions. Using Wi-Fi wireless technology, MOBILETrak collects and transmits data in real time through web services to immediately interface with the live *Insight* data tables. Inventory Management, Release Job, Material Charge Outs, and Returns are now collected at point-of-work, providing a mobile solutions where it is needed.

For more information, contact PCS at 712-263-3106 or Integrity Data Solutions, Inc. at 480-458-0490 or www.ACCESSIDS.com
