

Professional Computer Systems, Co.

Features and Benefits

Studies from big research and industry associations like Gartner and CompTIA have shown that the average small-to-medium-sized businesses lose thousands of dollars a year to network downtime.

Professional Computer Systems, Co. (PCS) delivers proactive managed services that keep your network up and running at optimal efficiency, with superior network performance, security, and reliability—all at an affordable price.

WE OFFER:

24 x 7 Monitoring and Alerting

- PCS will proactively monitor your network and remotely address potential points of failure before they become critical
- When a site visit is required, immediate, automatic alerts guarantee a rapid response

Asset Management

- Initial network scan to discover and assess potential points of failure
- Ongoing scanning for up-to-date hardware, software and patch information that can also be used for theft, flood and fire insurance or taxation purposes
- Warranty tracking makes sure you don't pay for maintenance twice

Security Assurance

- Extensive reporting gives you a bird's-eye view of your entire network's security
- Continuous monitoring and alerting for viruses, worms, malware, and attempted network access by unauthorized users
- Network scans will also detect high-bandwidth interactive games or illegal peer-to-peer file sharing applications that monopolize business resources and often introduce viruses and spyware
- Patch inventory ensures your operating systems are up-to-date and not exposed to vulnerabilities

Preventative Maintenance

- PCS minimizes disruptions to your work environment by resolving issues proactively
- Deep, remote visibility into the health and performance of your IT assets allows us to diagnose problems faster than ever

Reporting

- You'll get comprehensive, graphical reports every month
- Accurate, up-to-date data simplifies capacity management and upgrade planning

Quarterly Business Reviews

- We'll meet every quarter to discuss the overall health and performance of your IT assets and ways to get the most out of your investments
- Extensive data about your IT will support more accurate budget forecasting
